

DIY Wine Cork Bulletin Board

At Home with J. Lohr

Materials

- Wine Corks
- Picture Frame*
- Hot Glue Gun & Glue Sticks*
- Cutting Board
- Knife with Serrated Blade

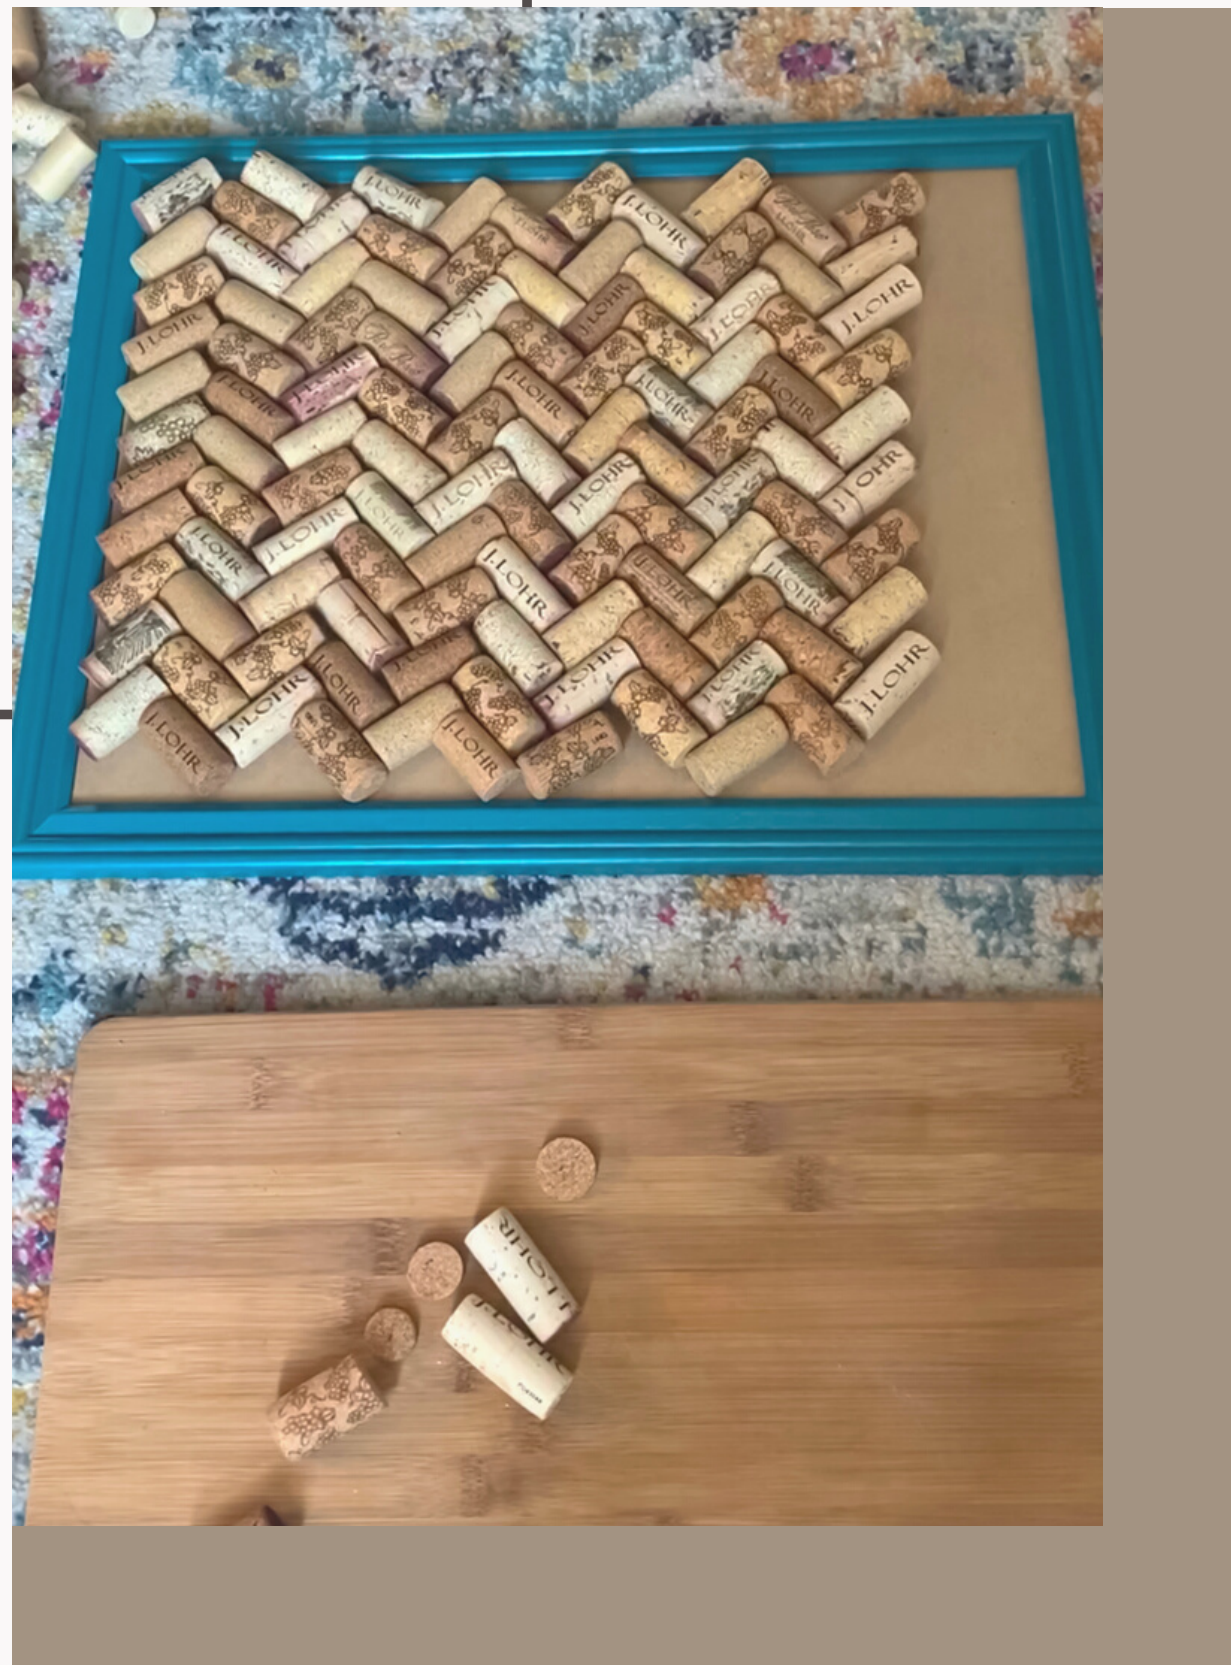

**JLV&W does not endorse or recommend
any specific brand of picture frame or hot glue gun*

STEP 1

- Remove the back of the picture frame.
- Take out the glass and matting.
- Replace backing only and close the brackets.

STEP 2

- Pick a pattern for your bulletin board design.
- Then, select a corner and start working your way out by lining up the corks.
- Note: you won't be gluing the corks down till step 3.
- Fill the entire frame with whole corks, then cut corks to size to fill in spaces around the edges of the frame.

STEP 3

- Once you have your design laid out, it's time to glue the corks to the frame backing.
- Apply a line of hot glue to the back of each cork and position it back onto the board.
- Once each cork is glued on, allow to dry and remove any excess glue strands.

STEP 4

- Find a spot near your workspace to hang your new Wine Cork Bulletin Board.
- If your frame has a stand, prop up and enjoy!

CHEERS!
